

**The International Hydropower Association (IHA) is a non-profit membership association.**

**We are the voice of sustainable hydropower.**

[hydropower.org](http://hydropower.org)

## Members

Leading hydropower operators, developers, designers, suppliers and consultants.

## Mission

to advance the development of hydropower by best practice sharing, to promote the use of hydropower as a sustainable energy source, and to support the development and dissemination of hydropower technology.

# San José Declaration (Sept 2021)

The San José Declaration on Sustainable Hydropower outlines **fundamental principles and recommendations** to guide new development and drive forward hydropower’s contribution to meeting global climate and development goals.

At the heart of the Declaration is a recognition that **“Sustainable hydropower is a clean, green, modern and affordable solution to climate change. Going forward, the only acceptable hydropower is sustainable hydropower.”**
